NEW RECORD FOR MEMBERSHIP IN THE ALUMNI ASSOCIATION

Final appeals for alumni dues for the fiscal year ending June 30th, 1928, were mailed by the finance committee on January 1st. More alumni have already paid dues than ever before but the officers of the association note with regret that many old dependables have not paid as yet. Thereby many a splendid record is marred.

188 alumni who paid \$3.00 dues last year have not paid for the current year. The loss of any of this group of loyal Maine men will be greatly regretted. If you are one of them we hope you will not overlook us any longer. Your continued help is needed.

It is a record breaking year already. Now is the time to set the mark of Maine loyalty high. Every alumnus who sends in dues now helps make a new high mark for the insurance of a glorious future for the alumni association and helps promise better support to the University. Have you done your part?

WHAT IS YOUR OPINION?

"Unless the university succeeds in continuing its influence upon its students in after years, it has failed in some measure in the task it set out to do."

Is this so? If it is, how shall the university "continue its influence?" By what ways and means?

NEEDED IN MAINE ALSO

Believing that alumni of Maine are deeply interested in all the vital problems of the state we print here an editorial that appeared recently in the Bangor Commercial, which points out the need of a medical college in Maine and which suggests that it should be a college of the state university. The *Alumnus* would be pleased to receive your comment on this.

"Doubtless the basic reason for the termination of the New Hampshire State Medical association to restore the four-year course of the Dartmouth Medical school is found in the scarcity of physicians in the rural communities of New Hampshire and the belief that with the opportunity to obtain medical degrees in the home state the scarcity will be in part remedied. Some years ago the Dartmouth Medical school cut its courses to two years leaving the students to complete their courses elsewhere. It was an action that was necessitated by scarcity of funds and the needs of the academic department of the college. The plan of the medical association is to obtain state financial aid and supplement this by personal contributions.

We expect that before many years there will be a definite and successful movement to re-establish a medical school in Maine. The Bowdoin Medical school passed out several years ago despite the desire of many physicians that it should be maintained. There could be no proper censure of Bowdoin college for terminating the medical courses which had long been maintained at material financial loss, but there was a sentiment that the retention of the school would inspire Maine young people to medical study and tend to retain them in the state at the termination of their course.

Maine today has no medical school and it is not likely to have one unless it is instituted by the state and materially aided by state money. There has been strong suggestion that a medical department should be established at the University of Maine. We have no doubt that the trustees and faculty of the Orono institution are willing to accept the responsibility but they must be assured that the establishment of a medical course is the desire of the state and that its needs will be met. Such should be a definite decision. The University of Maine has been left far too often to perform the state's work without adequate state assistance.

Men and women who have studied Maine needs are almost certain to include in them better opportunity for medical attention in the rural communities. One of the great causes of the flow of population from the country to the city is the lack of physicians available for the country dwellers. A great step in the upbuilding of the farm would be taken if the farm communities were provided with doctors. And a most reasonable step to overcome this need would seem to be the establishment of a medical school for the advantage of Maine young men and women. Developed and handled by the University of Maine with the advantage of the Bangor hospitals for study in actual practice a medical branch would result, we believe, in material benefit to the state. It is a matter that should receive mature deliberation in future legislatures."

—Bangor Commercial

FORTY MILLION DOLLARS IN FACILITIES FOR MAINE ALUMNI THROUGHOUT THE COUNTRY

When the complete story of the Inter-collegiate Alumni Hotel Plan is told, it will be a story of romance and achievement well worth the reading. Even at this early date, the plan having been in effect for only a year, we find the alumni organizations of ninety-three colleges, of which Maine is one, working harmoniously with the managements of forty hotels in an effort to fulfill a mission of worthy ideals and mutual interest—to bring to fruition a dream of far-reaching significance, yet withal a dream definitely possible of practical realization.

Like most tales of achievement the Inter-collegiate Alumni Hotel Plan had its beginning in comparatively humble surroundings. Six years ago a business man was made Alumni Secretary of the Uni-

versity of California Alumni Association. As a good business man he could not reconcile the thirty thousand California alumni in the state of California with the three thousand members of his Alumni Association. His sense of proportion told him furthermore that the fault lay not with the thirty thousand alumni but with the alumni organization. So he set about the development of a plan of rejuvenation and found himself hampered right at the start by the handicap which has beset alumni secretaries since the first class graduated from Harvard—lack of funds. There was a job to be done and no money with which to do it.

He considered the geographical distribution of his alumni and found them concentrated naturally in the vicinity of the larger towns and cities of the state. He knew that they could not afford to build club houses. He figured that they would not be inclined to lease even temporary quarters. He knew that they could be safely counted upon to be enthusiastic about the success of the football team or the crew and equally downcast over their failures. Nevertheless, he was positive that few of them could be counted upon to exert a great amount of personal effort in the development of local alumni associations. He knew, furthermore, that the weather reports concerning California were on the whole accurate as given out by the San Francisco Chamber of Commerce and not as inferred by the other forty-seven states in the Union. He knew that his alumni motored from one end of the state to the other, seeking pleasure and diversion, and that they motored throughout the year. In other words, he knew his Californians.

Taking all these things into consideration, he conceived the idea of having suitable hotels in the various cities act as official headquarters for the alumni of the University throughout the state. After conferring with the managers, it was decided that at the start the managers themselves were to act as local alumni secretaries. It was also decided that each manager should have in his possession a list of all the local alumni of the University together with their addresses and other information necessary to facilitate local contacts.

Next came the problem of publicity. How were the thirty thousand alumni to be told that the official hotels had been designated and that lists were available for the convenience of motorists or residents in affording contact with their friends and classmates? How were the alumni to be told that if they stopped at the official hotels they would receive cordial and friendly treatment and that the managements would do everything in their power to make them comfortable?

Publicity costs money, and there was no money in the treasury. There was more conferring and it was finally decided that inasmuch as the hotels would undoubtedly benefit from increased business, it would be fair for the hotels to defray the costs of the publicity, which they agreed to do.

So in the next issue of the California Alumni Monthly there appeared a page advertisement acquainting the members of the Alumni Association with the whole story and asking them to center their activities in the hotels which displayed the Sign of the Bear, the emblem to be displayed over the main entrance of the designated hotels. Pictures of the hotels appeared in the page of publicity.

During the year that followed the Alumni Secretary travelled throughout the state, notifying the hotel managers as to his time of arrival, in anticipation of which dinners, luncheons and parties were staged at the official hotels, the managers themselves arranging the details. Suffice it to say, that in three years the Alumni Association of the University of California grew from 3,000 to 18,000 members, divided into strong local clubs each of which had become an important factor in local affairs and each of which was administered effectively by officers pleased to serve because of the tangible importance of the work in which they were engaged. Each local club made its headquarters in an official hotel at no cost to itself.

Seeing the success of their neighbor at first hand, Stanford and the University of Southern California seized upon the plan which had proved so effective. In order not to divert attention the same hotels were selected by Stanford and Southern California. The same methods were used and the alumni association of both institutions prospered as had their predecessor.

In 1924 the Alumni Secretaries and Editors of practically all of the American colleges had their annual convention at Lehigh University in Bethlehem, Pennsylvania. The major subject up for discussion was the possibility of a coordinated effort to stimulate the interest of alumni generally in college problems and to increase in some way the number of local alumni associations and the activities of existing local clubs on some basis other than the time-worn plea of loyalty and affection to Alma Mater. Actuated possibly by a desire to prove that Mr. Greeley was wrong, the Alumni Secretary of the University of California came East to propose the nationalization of the plan which had been applied successfully in one state by one university. No doubt he figured that the standards maintained by California would be difficult of duplication. Californians are that way. Never-

theless, he presented his plan and it was received with acclaim.

You can readily picture the task of organization which was thrust upon the convention at Lehigh; the committees that had to be appointed; the theories that were expounded and exploded, and the general furore which naturally followed the adoption of such a plan by sixty alumni secretaries and editors in convention assembled. To make matters even more interesting alumnae secretaries and editors from the women's colleges were present.

Out of the confusion there emerged a year later a triumphant committee, the specific task of which was the accomplishment of the Intercollegiate Alumni Hotel Plan. The plan as evolved contemplated the designation in every large city in the United States and Canada of an Intercollegiate Alumni Hotel. At the hotel was to be maintained a card index of the resident alumni of all the participating colleges, and to the hotel were to be sent the current copies of the alumni publications. Hotels were to be supplied with information leaflets, reservation cards and various other items that would facilitate the service which they might render alumni and alumnae. A suitable shield was designed to be displayed by the hotels in the lobbies, with reproductions of the shield to be used on the stationery of the hotel if it so desired.

A non-profit corporation was formed to administer the plan, the directors of which were alumni secretaries and editors serving without compensation. A small central organization was created to present matters to the hotels throughout the country and to effect the necessary contacts and arrangements incidental to the consummation of the work at hand.

Fundamentally the plan as adopted was much the same as the successful California experiment. The hotels were called upon to pay a fee, which fee was to be used for publicity purposes and for organization and material. The alumni organizations were to pay the costs incident to the dissemination of the lists of alumni and the alumni magazines and in supplying the cooperation necessary to success.

Today, one year after the start of the plan, more than a million alumni in the United States have, for their convenience and comfort, facilities which total to a value of more than forty million dollars. New college alumni organizations and new hotels, viewing the practical application of the plan, are applying for admission. The number of participating colleges has increased from eighty-two to ninety-three, the eleven new participants being urged to apply at the request of alumni desirous of obtaining the advantages of the plan.

MAINE THIRD IN NATIONAL CROSS COUNTRY

The Maine varsity cross country team, State and New England Champions grabbed off a third place in the National Classic held at Van Cortland Park in New York.

Harry Richardson, Maine's sturdy distance man pushed Bill Cox the winner and finished a scant 100 yards to his rear, beating out Captain Reid of Harvard who copped third place. Francis Lindsay, Maine's sensational freshman of last year copped fourth position ahead of two veteran Penn Staters. He was just 24 seconds back of his teammate, Richardson. The next Maine man to finish was Vic McNaughton who got 15th position. Benson placed 22nd and Cushing 26th.

Cox took the lead at the start and relinquished it twice in the first mile before the fiery challenges of Jim Reid of Harvard. Forging ahead at the mile mark he opened the throttle gradually until, with two miles to go, he had a lead of 100 yards. As they coasted down a slope and swung into the home stretch, Richardson cut his lead to 80 yards, but Cox opened it up to 100 again in the last few strides. Reid was third, just five seconds back of Richardson.

Behind the three leaders the field was closely bunched at the finish with Francis Lindsay of Maine fourth, Ben Merembeck of Pennsylvania fifth, then Louis Lee and George Offenhausser, Penn State veterans, sixth and seventh.

By winning this nineteenth annual race Cox became the third man in the history of the event to gain the individual crown in successive years. John Paul Jones of Cornell, who won in 1910, '11 and '12, and John Overton of Yale who won in 1915 and '16 were the only others ever to accomplish the feat. Cox was captain of his team, although only a junior.

The leading finishers in order:

VARSITY RACE

Po	Name	College	Time
1	W. J. Cox	Penn State	30:36½
2	H. L. Richardson	Maine	30:54
3	J. L. Reid	Harvard	30:59
4	F. C. Lindsay	Maine	31:18
5	B. Merembeck	Penn	31:19
6	Louis Lee	Penn State	31:23
7	G. K. Offenhaus'r	Penn State	31:30
8	R. G. Luttman	Harvard	31:34
9	A. I. Totten	Union	31:35
10	Joseph Hagen	Columbia	31:36
11	L. J. Heath	Union	31:40
12	H. A. Kittle	Penn State	31:41

Manhattan	53	94	97	99	100—443

THE FAMOUS MAINE BAND

The University of Maine Band, the largest and only band among the state colleges to form human college letters at athletic contests, is one of the leading organizations at the college today. It has grown in strength until it now has an enrollment of some 80 members.

The band at the University is not merely a voluntary group of students desiring to form a musical club, but it is well organized and conducted as regular class work for which students are required to register as in any other class and for which they receive academic credit.

The band meets for rehearsals twice a week, every Tuesday evening and Saturday forenoon. At the beginning of the year, Professor Sprague takes charge and conducts the rehearsals; but as time goes on he retires in favor of a student director, for he believes the students will be most benefitted by actually conducting the band themselves. Professor Sprague, during the course of a year, lectures on general problems of interpretation and on the principles of time beating and conducting, both from the standpoint of the player and of the conductor.

At all the State football games in which Maine was playing this past Fall, the band attracted a great deal of attention. Between the halves of the football games, the band, led by its student drum major, Gordon E. Hammond of North Berwick, would swing onto the field, and in true military fashion to the front of the opposing cheering section, and there, with little hesitation, would arrange itself in the form of the opponent's college letter and play the college song. At a whistle signal from the leader, the band would come back in marching formation and would proceed to the front of the Maine section and in like manner form an "M" and play the Maine Stein Song.

ATTACHED TO RESERVES

The band is a full fledged military organization, being attached officially to the Reserve Officers' Training Corps. All non-commissioned officers are appointed by basis of class seniority, musical tendencies and efficiency and faithfulness in attendance. The members are graded both on ability and attendance at rehearsals.

This year the band is to be given an opportunity to broadcast a program from station WABI, Bangor. An attempt is also being made to take the band on a concert tour through northern Maine, visiting Caribou, Presque Isle and Houlton.

FATHERS OF FRESHMEN IN MANY OCCUPATIONS

The following table showing the great variety in the occupation of the fathers of members of the present freshman class may be of interest. Practically one-third of the students entering the College of Agriculture this year are farmers' sons and daughters. The corresponding fractions for the College of Arts and Sciences and the College of Technology are one-seventh and one-sixth respectively. On the other hand, the students in the College of Technology are, as might be expected, much more largely sons of engineers, skilled workmen, manufacturers, carpenters, machinists, and other occupations allied to engineering. Merchants' sons and daughters tend more to the College of Arts and Sciences.

	U	A	Arts	T
Farmer	69	26	19	24

FORESTRY SENIORS IN BIG WOODS FOR TWO MONTHS

The camp course of eight to nine weeks' practical experience which is required of all Forestry seniors will begin on Monday, Nov. 28. During the next two months the men will see, study, and work with actual lumbering and woods operations of the Great Northern Paper Company. Excellent opportunities for first hand information is afforded by the active logging operations which are to take place for a radius of some five or six miles around the camp site. It is located on the main haul road where some 20,000 cords of pulp wood will be cut during the season.

Cruising, mapping, logging engineering, and Forest Management are the four major lines to be studied under the direction of Ass't Prof. Gilbert I. Stewart of the University; Mr. Gruhn of Augusta, Maine State Forest Commissioner; and Mr. F. H. Gilbert of the Great Northern Paper Company.

Inasmuch as there has been some delay in selecting a camp, the boys will not be able to be at home over the Christmas holidays. At the end of their stay in the woods, however, they will have two weeks of vacation.

The site decided upon is in the vicinity of Cooper Brook, which is east of Moosehead Lake, near the Kokadjo post office. Four portable camps which were previously used at Rainbow and Grindstone are available. A new one is under construction and will be used for a commissary and mess hall. These camps are furnished and equipped by Great Northern, and the living expenses will be divided pro-rata between those in attendance.

PERRY, TRUSTEE OF INTERNATIONAL COLLEGE

Donald B. Perry '18 is a trustee of the International College at Smyrna, Turkey. Altho he has been serving as a trustee for nearly a year, it was not known until the recent visit of Dr. Cass A. Reed, president of that college to the University.

This appointment is not only in recognition of Mr. Perry's interest in Turkey but is also an acknowledgement of the Maine in Turkey work supported by Maine alumni, students and faculty.

Following the close of the war Mr. Perry with Lee Vrooman '18 and Joseph Beach formerly of Bangor, spent many months doing relief work in Turkey, so he is somewhat familiar with conditions in the country.

He has been active in promoting Maine in Turkey which provides funds for the use of the three Maine graduates, Helen

and Lee Vrooman '18 and Ruth Hitchings '27, in organizing and conducting clubs, furnishing needed athletic or other equipment and material to assist in teaching loyalty, team work and fair play.

RUTH HITCHINGS '27 WRITES FROM TURKEY

"Smyrna at last is a reality and a beautiful one. Our school is located among the olive, fig and cypress trees and overlooks the city proper and the bay. From my desk I watch the big ships come into the harbor and realize they are the one link between me and America," writes Ruth Hitchings, '27 of Caribou, who has gone to Turkey for three years joining Helen and Lee Vrooman '18 and "carrying on" Maine in Turkey.

Miss Hitchings replaces Ruth R. Crockett '25 who taught two years at the American Girls School in Smyrna but who was called home because of sickness in the family. While Maine alumni and students regretted sincerely that Miss Crockett had to return because of the success she was attaining, they are genuinely happy to learn that another Maine alumna was to take up the work Miss Crockett left.

So interesting and enthusiastic is Miss Hitchings about her trip and her new work that her spirit is fairly contagious. She is teaching one class of biology, two classes of hygiene and five of English—and

she writes "it is great fun—I really have a good time out of it."

"Teas galore"—one can fairly imagine the exuberant spirit of the writer as she goes on to say "Five o'clock never passes in this country without a cup of tea for everyone. The Turks serve a thick, black Turkish coffee and even tho one is in a carpenter shop ordering book cases as I was one day, coffee was served. I think it is delightful."

In discussing teaching, Miss Hitchings says "I marvel that more people have not come to teach here. The work is fascinating and calls for every bit of resourcefulness of which one is capable."

"I have never regretted for an instant the fact that I came. From the very beginning each step has been just a bit nicer than I expected" characterizes the attitude of this—our latest Maine graduate who has gone afar to teach Maine ideals and Maine loyalty.

BUZZELL 1928 FOOTBALL CAPTAIN

James C. Buzzell '29 of Fryeburg, veteran half-back, has been elected captain of varsity football. For two seasons he has been a steady, dependable and even flashy performer on Maine championship teams. This year he made the mythical All-Maine eleven. He has weight and speed.

Buzzell entered Maine in the fall of 1924. He played on his freshman team. Later he left college on account of illness returning to win a place on the 1926 championship team. He is a member of Phi Kappa Sigma fraternity.

NEW SONG BOOK

An alumni committee is working on a new song book for the University. It is a difficult job. The old song book, now completely sold out, must be revised. Many songs must be dropped and many new ones added. The committee would appreciate hearing from all interested as to songs that should be dropped or added. Also new songs for Maine are always needed and all having ability along this line should submit their compositions. Write the Song Book Committee in care of the alumni office.

Are there too many "Personals" in this issue?

Tie up with a going, growing organization. The alumni association is booming. More members already than ever before. Yours will help.

METERMEN GIVEN SPECIAL COURSE DURING VACATION

Following out the policy adopted by President Boardman of the University and Dean Cloke of the College of Technology to be of greater service to the people of the State of Maine, the Electrical Engineering department in co-operation with the National Electric Light Association held a Short Course for Metermen at the University December 27-30.

There were forty-seven in attendance. This number included the Chairman and Vice-Chairman of the New England Meter Committee of the National Electric Light Association, the Maine representative of the National Meter Committee, also four representatives from the Westinghouse Electric & Manufacturing Co., two from the General Electric Co., one each from the Sangamo Electric Co. and the Weston Electrical Instrument Corp.

The Bangor Hydro-Electric Co. sent nine men to take the course. Eight came from the Central Maine Power Co. Four from the Gould Electric Co. Two from the Livermore Falls Power and Light Co. And single representatives from several smaller companies.

The success of these courses which are held in different parts of the country is due to a combination of theory and practice in proportions to be of the greatest benefit to the men responsible for the accurate measurement of the product of the electrical plant from which the revenue of the electrical power company is derived. The electrical engineering faculty is assigned the duty of explaining the principles and theory of the subject. The men from the manufacturing companies exhibit their apparatus and explain its use, operation, tests, etc. The officers and representatives of the meter committee are experts in the operating field. This is obviously a combination hard to surpass.

In addition to the two daily sessions, a banquet was held Tuesday evening at which Dean Cloke presided and President Boardman spoke. A lantern slide lecture was given and three reels of moving pictures were shown on Wednesday evening. A lantern slide and microscopic projection lecture on "Jewels" was enjoyed on Thursday evening.

An enjoyable feature of the course was the housing of the men in Hannibal Hamlin Hall where they could be together and gain in acquaintance. Representatives who had attended similar courses in other states were strong in their commendations of the success of the course and the enjoyment of their visit.

It is probable that this course will become an annual affair at the University of Maine.

THE ALUMNUS

Takes off its hat to Paul Sargent, who has severed his connection with the Highway Department of the State of Maine after accomplishing the maximum in better roads, and following a construction policy that considered both the future and the finances of the state.

Congratulates Pierce because he has not been satisfied with doing all anyone might expect but has proven himself, in his field, a Lindberg, only aspiring to the worth while things of life and always doing more. His work at Cony High, Augusta, reflects much glory on Maine while proving that Eddie is indeed a man.

Thanks God for Wm McC Sawyer. A real son of Maine who regardless of any personal sacrifice of time, pleasure or money, does his bit and does it, if he can, in the background.

Greatly rejoices in the efficient, hard working Finance Committee made up of A. L. Deering, '12, A. K. Gardner, '10 and C. E. Crossland, '17 which has secured

hundreds or more members to our alumni association than it ever had before.

Endorses Dean Paul Cloke of the College of Technology, who after a year at Maine loves the University so much that he is not satisfied with knowing its undergraduates alone but requests an opportunity to visit the local alumni associations so that he may know the alumni as well.

Approves of Miss Helen C. Libby, ex-'26, once a co-ed of less than a year, but a Maine alumnus who in that short time acquired the Maine spirit sufficiently to answer the first call for alumni dues that was sent her. More power to her and more like her would insure Maine's future and raise Maine alumni to a high peak of influence and power.

Expects much from the class of 1927 for the Maine men and women who compose it have set a new record in loyalty for posterity to shoot at. Approximately 150 members of this class are now paid up members of the alumni association. Before the end of the fiscal year (June 30th next) more than 50% of its members will be enrolled. Other classes note and try to better.

NEW HEAD OF STATE HIGHWAY COMMISSION

Paul D. Sargent, '96, has resigned as head of the State Highway Commission. Lucius D. Barrows, '07, who has been assistant engineer in the highway department since 1910 has been elected to fill this vacancy. He is a native of Dover-Foxcroft and graduated in civil engineering from Maine in 1907. His selection is a popular one.

Mr. Sargent has been chief engineer for many years. His administration has been most successful and the fine roads now found in Maine are a monument to his diligence and efficiency.

GYMNASIUM ARMORY MEMORIAL FOR MEMORIAL BUILDING COMMITTEE - UNIVERSITY OF MAINE - ORONO, MAINE
LITTLE AND RUSSELL - ARCHITECTS - BOSTON, MASS.

Alumni Personals

WEDDINGS

Ex-'17—Verner E Gilpatrick and Miss Viola E Fletcher were married recently in Bangor. Mr and Mrs Gilpatrick are residing at 80 Center St, Bangor. Mr Gilpatrick is a well known Bangor attorney.

'27—Eugene D. Scribner is engineering with The Baldwin Locomotive Works. Mr. Scribner is located at 121 Chester Pike, Norwood, Pa.

Ex-'27—Donald C. Stanchfield is at Katahdin Iron Works.

How Is Your CREDIT?

YESTERDAY—
life insurance agents
were considered a bore, a
time consuming nuisance.
That prejudice has disap-
peared now.

Today, if you ask a
banker about your credit,
he asks you about your
life insurance.

But, though you may
have enough insurance
to satisfy your banker,
you may not have exactly
the right arrangement of
policies to secure you and
your dependents the max-
imum of future security.

A John Hancock agent
is a specialist in security
for the future, the founda-
tion of mental serenity.

Ask him to come in.

John Hancock

How many are 421,000 stockholders?

*An Advertisement of the
American Telephone and Telegraph Company*

ON OCTOBER 15th, American Telephone and Telegraph Company checks representing the 152d dividend were mailed to its 421,000 stockholders. That is the largest number of stockholders of any company in the world.

The American Telephone and Telegraph Company is owned by a great investment democracy.

Its dividend checks are cashed at banks in every state in the Union, by people representing all trades, stations and professions.

No institution is more nationally or publicly owned than the American Telephone and Telegraph Company, which in turn owns more than 91% of the common stock of the operating companies of the Bell national System. The average holding is 26 shares, and no one person owns as much as 1% of the total stock.

The Bell System was developed in the interest of telephone users and is owned by the public that it serves.

These hotels are your hotels

Special features are provided for our Alumni

Our alumni are urged to use Intercollegiate Alumni Hotels when travelling, and when arranging for luncheons, banquets and get-togethers of various sorts.

You will find at each Intercollegiate Alumni Hotel an index of the resident Alumni of the participating colleges. Think what this means when you are in a strange city and wish to look up a classmate or friend.

You will find at these hotels a current copy of your Alumni publication.

You will also find a spirit of co-operation and a keen desire to see you comfortably housed and adequately provided for. Reservations may be made from one Intercollegiate Alumni Hotel to another as a convenience to you.

Intercollegiate Alumni Hotels are a new and vital force in assisting your Alumni Secretary. He urges you to support them whenever and wherever possible. He will be glad to supply you with an introduction card to the managers of all Intercollegiate Alumni Hotels, if you so request.

THE PARTICIPATING COLLEGES

The alumni organizations of the following colleges and universities are participants in the Intercollegiate Alumni Hotel movement:

Akron	Colorado	Maine	Oregon State	Virginia

In the modern hotel, electrical service includes lighting, elevators, fans, signal systems, coal-handling, pumping systems, laundry, vacuum cleaners, cooking, dish washing, ice cream freezers, vegetable parers, meat grinders, dough mixers, barber's apparatus, and ventilating equipment.

You will find this monogram on many electric devices used in the modern hotel.

Hundreds of Motors at your service

ONE hundred and eighty-seven million people registered at hotels in this country last year. One hundred and eighteen million people expecting modern comfort.

What a diversity of service these figures represent; a personal service rendered by hundreds of thousands of men and women. Back of them, carrying the physical load, making this service possible is—electricity.

Electric lights add comfort and convenience. Electric laundry equipment cleanses and sterilizes the linen. Electric elevators carry guests quickly and comfortably to their rooms. And in hundreds of other ways electricity makes modern service possible.

Only two and a half cents of the guest's dollar is needed to pay for this tireless servant. And how much this small amount of money accomplishes!

GENERAL ELECTRIC
